Use Cases

Quality Attributes

Scalability :

- More than one student will be using the system in future.
- Checking information frequently as system gets bigger.

Usability :

- The system should be user-friendly, ensuring that students can easily fill in their information and search for books without confusion.
- The user interface should be intuitive and accessible.

Security :

- Protect student information, such as personal details and borrowing history, from unauthorized access.
- Ensure that sensitive data is encrypted when transmitted.

Constraints

- Fill information incorrectly
- Some books need pre-requests subjects for them
- Send warning fees if not returning book on time

Conclusion

- This use case was designed lovely by Yousef Ghanem and Anas Abu Zarour.😊
